Life is a JOURNEY, Enjoy the ride!

MINI COOPER SHOWN WITH CP-5M UNIVERSAL LIP MOUNT AND COAX CABLE COMBINATION. NO HOLES TO DRILL!

MODEL	ANT CONN / COAX CONN
CP-5M	SO-239 / PL-259
CP-5NMO	NMO / PL-259
CP-5 3/8-24	3/8-24 / PL-259

Heavy-duty adjustable lip mount bracket with 16' 6" deluxe cable assy includes 18" mini RG-188A/U type coax for weather seal entry.

Max antenna 70" Attaches to trunk side/ van door/SUV door/ truck doors etc..

COMET BNC-24 DUAL-BAND 2M/70CM HT ANTENNA RX range: 100-1200MHz
• Gain: 2.15/3.5dBi • Length: 17" • Conn: BNC Super flexible featherweight whip

COMET SMA-24 DUAL-BAND 2M/70CM HT ANTENNA RX range: 100-1200MHz
• Gain: 2.15/3.5dBi • Length: 17" • Conn: SMA Super flexible featherweight whip

COMET SMA-503 DUAL-BAND 2M/70CM HT ANTENNA RX range: 100-1200MHz
• Length: 8.75" • Conn: SMA

Maldol MH-209 *(BNC Conn)* **MH-209SMA** *(SMA Conn)* **2M/70CM DUAL-BAND HT ANTENNAS**
3" length, soft rubber cover. Good performance in a small package!

COMET NEW! CSB750A DUAL-BAND 2M/440MHZ W/FOLD-OVER
Gain & Wave: 146MHz 3.6dBi 1/2 wave, 446MHz 6.1dBi, 5/8 wave x 2 • VSWR: 1.5:1 or less • Length: 42" • Conn: PL-259 • Max Pwr: 150W

COMET NEW! CSB770A DUAL-BAND 2M/440MHZ W/FOLD-OVER
Gain & Wave: 146MHz 4.4dBi 5/8 wave center load, 446MHz 6.9dBi 5/8 wave x 2 center load • VSWR: 1.5:1 or less • Length: 51"
• Conn: PL-259 • Max Pwr: 150W

COMET NEW! CSB790A DUAL-BAND 2M/440MHZ W/FOLD-OVER
Gain & Wave: 146MHz 5.1dBi 7/8 wave center load, 446MHz 7.7dBi 5/8 wave x 3 center load • VSWR: 1.5:1 or less • Length: 62"
• Conn: PL-259 • Max Pwr: 150W

Maldol AX-50 DUAL-BAND 2M/440MHz
Gain & Wave: 2M 1/4 wave • 70cm 5.0dBi 9/8 wave • Length: 21" • Conn: PL-259 • Max Power: 60W

Maldol AX-75 DUAL-BAND 2M/440MHz W/FOLD-OVER
Gain & Wave: 2M 1/2 wave center load 3.2dBi • 70cm 5/8 wave x 2 5.7dBi • Length: 30" • Conn: PL-259 • Max Power: 60W

Maldol AX-95 DUAL-BAND 2M/440MHz W/FOLD-OVER
Gain & Wave: 2M 1/2 wave center load 3.3dBi • 70cm 5/8 wave x 2 5.8dBi • Length: 38" • Conn: PL-259 • Max Power: 60W

COMET B-10 / B-10NMO DUAL-BAND 2M/440MHz
Gain & Wave: 146MHz 0dBi 1/4 wave • 446MHz 2.15dBi 1/2 wave • Length: 12"
• Conn: B-10 PL-259 ,B-10NMO - NMO style • Max Pwr: 50W

COMET SBB-2 / SBB-2NMO DUAL-BAND 2M/440MHz
Gain & Wave: 146MHz 2.15dBi 1/4 wave • 446MHz 3.8dBi 5/8 wave centerload • VSWR: 1.5:1 or less • Length: 18"
• Conn: SBB-2 PL-259 • SBB-2NMO NMO style • Max Pwr: 60W

Maldol EX-107RB / EX-107RBNMO DUAL-BAND 2M/440MHz
Gain & Wave: 146MHz 2.6dBi 1/2 wave • 446MHz 4.9dBi 5/8 wave x 2 • VSWR: 1.5:1 or less • Length:29"
• Conn: EX-107RB PL-259 • EX-107RBNMO NMO style • Max Pwr 100W

COMET SBB-5 / SBB-5NMO DUAL-BAND 2M/440MHz W/FOLD-OVER
Gain and wave: 146MHz 3dBi 1/2 wave • 446MHz 5.5dBi 5/8 wave x 2 • Length: 39"
• Conn: SBB-5 PL-259, SBB-5NMO - NMO style • Max Pwr: 120W

COMET SBB-7 / SBB-7NMO DUAL-BAND 2M/440MHz W/FOLD-OVER
Gain & Wave: 146MHz 4.5dBi 6/8 wave • 446MHz 7.2dBi 5/8 wave x 3 • Length: 58"
• Conn: SBB-7 PL-259, SBB-7NMO - NMO style • Max Pwr: 70W

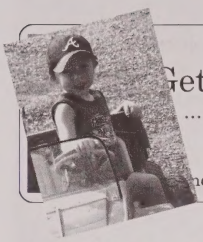
On the Cover:

Henry Heidtmann, W2DZO, presents another North Carolina QSO Party (NCQP) award to Pennsylvania op Keith Pederson, WA3HAE, at the 2006 Dayton Hamvention. Since the year 2000, Henry has built the NCQP into one of the most-participated-in state contests. Read about the results in Mike Lewis' column on page 7, and get your station ready to use those new HF priviledges! Watch for details on the next contest, at the end of February, at < www.w4nc.org >.



Get The Hammer!

... and let's get technical

Zach

by Andy McKenzie, KK4EJ

Daddy's New Radio and "other" hobby.

Guest writer, Zachary McKenzie featured:

"Daddy got a new radio in his white truck. It has buttons and has colors on the talk thing. He won't let me talk on it, but me and sissy will try it out when he lets us. I can climb up high on the thing on the back.

Daddy even let me play a game on his new 'puter. Sissy got to play pinball. I like daddy's new radio."

The above was translated from my son Zach. I thought it would be fun to look at my work truck through his eyes, so the other afternoon I sat with him and let him talk about the things in my truck.

I recently installed my new STARS radio system in my VSP pickup. The control head, repeater package and laptop all were arranged about four times before I was satisfied with the placement. While we do not have the new trunking system statewide yet, I am operating it in conventional mode. So far I like some things and dislike some things, which is normal for me with new toys! I'll write in more detail in the future about STARS.

Seeing the world thru Zach's 4 year old eyes was fun for me. The control head can have the backlight changed to different colors, and the "thing on the back" he climbs on is my home-made HF antenna. Seeing these new toys reminds me of the excitement many of us have with new things. I'm the same way with my "other" hobby too!

After I mentioned my other hobby in the last issue, I received several nice emails from other hams that are also Model Railroaders. I have been a train "nut" as long as I can remember. Since I was a little boy, not much older than Zach, I wanted my trains setup, a layout for them, and now I finally have the chance to build my "dream." The layout fills about 2/3 of my basement, and a workshop, bathroom, wood stove and storage fills the final third. My wife reminds me often about how much space I have for my trains, but I only respond with a smile and say "yes and that's my dream come true". I won't mention her (tons of) shoes.

My HO scale railroad is in the beginnings of scenery, the bench-work, wiring and track is basically done. The plan is based closely on the north end of the Clinchfield, from Kingsport TN to Elkhorn City KY. The thing about model railroading is it has a little of everything included: carpentry, painting, wiring, and a lot of creative thinking as you build a new world in reduced size. A layout is almost never finished either, because once the big projects are done, you go back and add details, as well as operate everything!

A hobby is important for us, whether it's radio, trains or gardening. We need a place to relax and enjoy some tinkering time. This world seems to be speeding up on me, and by press time I will have returned from a three week Motorola school in Schaumburg, IL. I enjoy traveling and enjoy seeing the country but enjoy being on the porch with the family a lot more!

So enjoy your hobby time. Take time and smell the flowers. Take a few minutes and look at the world through a kids' eyes. I found it looks a lot more fun that way!

I would also like to honor my dad, Grover McKenzie. He has decided to retire at year's end after a 35+ year career with the Virginia State Police. I've grown up around the department and feel like everyone is family. I've seen the good and bad parts, and seen the dedication, long hours and sacrifice. Now he deserves a long retirement: To travel with mom, ride his Harley, to spend time on his hobbies (he is a gunsmith), to share more of his time with grandkids, and to take me fishing in his boat (hint-hint!).

So until next time....smile...eat more ice cream and enjoy using the hammer!

Let's Look At It--- This Way !!!

Marvin Whatley, AA4YW

Or would you rather be a fish?

Everybody profiles people and divides them into clumps that they can consider collectively, and everybody agrees that we shouldn't do it. Since most of us limit our interpersonal contacts to our immediate circle, and since the world is so big, it just happens. When you are a member of the particular subset about whom jokes are being made and specific character flaws are being enumerated, you may take umbrage. So I am an engineer, and I do. Recently I heard a learned sage who teaches literature in a prestigious school speak of how obtuse engineers are and how unappreciative they are of the arts and humanities. This subset of geeks spend their lives enmeshed in numbers and formulas and obscure facts to the exclusion of wonder and beauty.

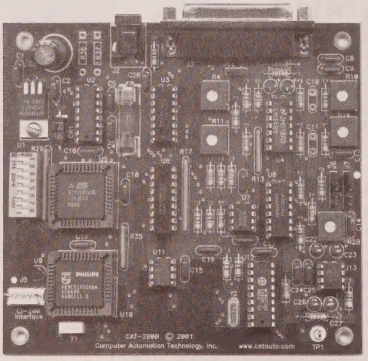
Was he talking about me? It is and has forever been true that the engineering curriculum is demanding, and students who aspire to do well are required to concentrate on relevant material including much mathematics and much fundamental phenomenological analysis. They start with the basic rules of how the physical world works, a discipline that only a few sciences and no business, nor law, nor art now thinks is important. Hence, when an engineer looks at the world he sees things a little differently from the layman. There are forces and vectors in stability and motion. A ball bouncing obeys common laws, as does an egg frying or a car stopping or person walking. They all relate to principles that go into understanding, analysis and design. For most of them he knows formulas that he might easily employ, and he also knows the limitations of these formulas and how to anticipate or find more rigorous relations to account for more subtle second order effects. Physical things that are happening comprise the world that he sees and he is unlikely to relegate even mundane observations to a nether world beyond understanding. Because most people don't care, they consider him a bore.

This different perspective colors his approach to arts and humanities; his view of geography tends to focus more on landmasses and climatology than cultures, and his view of history more on the evolution of technology and science than the succession of Royal Houses. He is more likely to know where steam engines replaced water wheels and when low carbon steel became a common material of construction than who succeeded Henry VIII on the British throne. He probably knows more about Mozart's music than he does about Mozart.

In the Louvre in Paris (yes, I've been there) people cluster around Da Vinci's Mona Lisa, gaping in wonder

CAT-200 Repeater Controller

This controller was specially developed to provide remote base linking operation and a voice synthesizer at an extremely affordable price.



Features Include:

- Voice Synthesizer ID
- (12) Voice Messages
- CW Identifier
- Beacon Message
- Remote Base Port
- DTMF Audio Muting
- DTMF Pad Test
- (30) Control Functions
- (4) Logic Inputs
- (4) Output Switches
- Optional Peet Weather Station Interface *
- Optional Windows ® Editor Program *

* Requires CI-200 Computer Interface

Internet: http://www.catauto.com

as the guide spiels off interesting facts about the painting. They ooh and aah as they absorb large doses of culture. It's supposed to do wonderful things for them and they will tell all of their friends back home "I got to see the Mona Lisa!" But, what is it they actually see, and what does it actually do for them? There are many pages written on the history of the painting and Da Vinci's obsession with it and how it was lost and found, and this is all interesting. I do think it is a beautiful work of art, and I am glad that humanity can glom onto something like this and elevate it to such a high level of importance. I think.

From a completely different point of view, it is only a hunk of painted board (not canvass!) that is hanging on a wall. Now, consider the wall. It is a wall in a hall with a roof over it where the light, temperature and humidity are controlled. How did that happen? It isn't part of the main agenda, but somebody built the building. The Louvre is really quite old, parts of it dating back to Da Vinci himself when the lines between art and engineering were less finely drawn. It is still a matter of contention whether Da Vinci was a great artist who dabbled in engineering or a great engineer who dabbled in art. But nowadays an architect (artist) comes up with a layout of how the structure is supposed to look and to feel and he takes this to an engineer (really) who usually tells him that if he builds it that way it will fall down. So the architect tries again and the engineer tries again and after several passes the engineer tells the architect what can actually be done to get what he wants. (In truth there are "Architectural Firms" that employ platoons of engineers and the process all happens in-house.) There will be concrete and steel and glass and other more expensive materials and the structure will be put together from the ground up using principles and techniques developed by engineers over a very long time. And when it is finished, the architect is praised and it's just a wall on which to hang a picture.

A disturbing asocial quality of engineers is their tendency to drag a conversation down to a quantitative level. When he is told that crime is increasing, he might respond by asking for numbers and try to relate it to the threat to the average citizen. When told that a plant releases toxic gases, he might want to know what gases and how much. (Toxic gases are all around us.) When told that acid rain is causing problems he might want to know where and how much. The normal citizen is perfectly satisfied with the knowledge that acid rain is bad and power plants cause acid rain so any proposal made by the local activist should be totally supported.

The engineer must make decisions on real physical systems from available information and he must recognize and compensate for uncertainties. Unlike the efforts of professionals who deal with more obscure consequences from their input, the engineer's error means an actual structure fails, or a device doesn't work. Because he lives closer to the real world than any other professional, he keeps his logical tools well honed and is generally intolerant of fuzzy thinking. This sometimes is manifest as ineptitude at small talk.

By the way, we all worry about atmospheric pollution. Do you know how many tons of air there are in the atmosphere, within a few percent? Although few engineers have that number handy, almost all could calculate it in five minutes from the numbers they have in their heads. What you need is the area of the surface of the earth (I start with the circumference in nautical miles (360x60)) and atmospheric pressure (14.7 psi), a couple of simple formula and a few conversion factors, and voila, five times ten to the fifteenth tons. That number means nothing to most people, and I could calculate the tons of atmospheric CO_2 and that would mean nothing either. It is enough to know that it is too high and increasing. While the engineer might be curious about the natural CO_2 cycles and the mechanisms for transport and interaction with oceanic carbonate the layman is generally not. But never mind, highly publicized environmentalists and popular celebrities have already told us of the terrible consequences of global warming. The pleading child on television generates public awareness (you know what that is!) and the politicians respond to enhance their approval rating by imposing industry-contorting regulations purported to solve the problem. Geeks only confuse things.

Those who actually live among engineers may not find them deficient in the arts and humanities. An engineering professor of mine whose

HI PRO REPEATERS

Hi Pro "R1" Repeater

144 MHz, 222 MHz or 440 MHz

Here is a compact **LOW COST** repeater (less controller) priced at just $699. A 35 watt VHF (2-meter) repeater with a computer controller, voice synthesizer, auto patch, auto dialers, user functions, etc. is priced at $1,179. This is not a kit, but a complete repeater with a two-year warranty. 222 and 440 MHz versions are also available!

Hi Pro "E" Repeater

144 MHz, 222 MHz or 440 MHz

The Hi Pro "E" is the choice if you need a repeater with a built-in power supply, plus room for an extra receiver, transmitter, small duplexer and controller. The front panel provides status indicator lights, a speaker, a microphone connection, control switches, etc. Prices start at just $1,450!

If you need a receiver or transmitter as a board or in an enclosure, we can provide them. These are the same high-performance units that are used in all of our repeaters. All have our new QUALITY AUDIO AND STABLE OSCILLATORS.

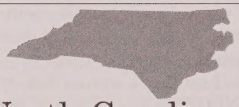
specialty was viscous flow through porous media was a widely quoted expert on Shakespeare. I have not read all of Shakespeare's sonnets or his histories, but have read his other works and have seen many performances. In literature I gravitate more to the older classics and love poetry. I've played my clarinet in a symphony orchestra and in small jazz groups. I've sung in an opera and served as a choir director. In addition to amateur radio I have dabbled in arachnidology, herpetology and pteridology and a variety of other things. While my specific experiences may be unusual I don't think I am an unusual engineer.

Once while driving in East Tennessee at late dusk the rising moon made silhouettes of some trees and a distant house. "Isn't that beautiful," said my companion. "Yes," I quickly agreed. I went on to explain that we rarely appreciate how large the moon is because when high in the sky there is nothing for reference, but when low we can compare it to things on the horizon. Further, the moon, over a quarter the diameter of the earth, could engulf the entire Manhattan skyline, given the appropriate vantage point and adequate optics.

"That's the trouble with you," she complained, "You always go off into some analysis and spout out facts and miss the loveliness of things."

On reflection I concede that my comments were likely insensitive and obviously inappropriate, but it is not true that physical understanding precludes appreciation of beauty. I know why the sky is blue and the sunset is red and what makes a rainbow and why the wind feels cold on my face and why clouds billow. I could actually write equations for some of these things, but rather than diminish, this expands and makes them more wonderful. I rather pity those whose world is so small and poor that when they look at the ocean with its turbulent waves or the snow cap on a mountain or the fluttering leaves on trees they see nothing beyond the silly obvious, and are obliged to contrive emotional fantasy to provide it meaning.



North Carolina

Michael J. Lewis, WA4KE

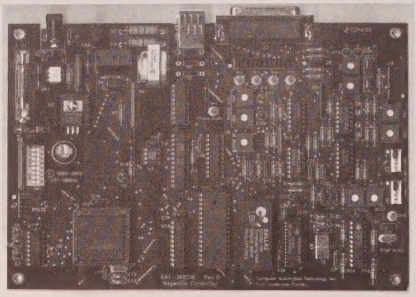
Leading off this quarter's column are the results of the 2007 North Carolina QSO Party provided by Henry Heidtmann, W2DZO, and Forsyth Amateur Radio Club. All of the results are published at http://www.w4nc.com/ncqpresults.html.

The single operator in state category features a repeat win by Russ, AK4GY from Cabarrus County with Barry, K4CZ, with only 30 less QSO's from Durham County placing second. Tim, K4TZZ, picks up 3rd place and the in state multiplier title with 46 NC counties worked from Polk County.

The Carolina DX Association once again grabs the in-state Club plaque for their 450 plus contacts from MEC with the BFB boys running 2nd place. Out of state, it was the Cornerstone ARC from Florida winning the plaque again.

CAT-300DXL Repeater Controller

The CAT-300DXL has all the features of the very popular CAT-300DX including a full feature autopatch and a Remote Base Port.



Features Include:

- Voice Synthesizer ID
- (20) Voice Messages
- Real Time Clock
- (20) Position Scheduler
- Full Feature Autopatch
- (100) User Speed Dials
- Emergency Speed Dials
- Reverse Autopatch
- Remote Base Port
- CW Identifier
- (20) User Macros
- DTMF Audio Muting
- DTMF Pad Test
- (4) Logic Inputs
- (4) Output Switches
- Optional Windows® Editor

This year's in state mobile competition was the closest in recent years. Last year's winner Jeff, NY4N, and NCQP newcomer Marty, W4MY, both made over 500 contacts, but when the dust settled only around 500 points separated the two.

Gerry Cohen presented on H1340 at the RARS meeting on July 3, 2007. H1340 is the NC Antenna Bill. Bill, N2COP wrote a great piece on this bill. Go to www.rars.org and download a newsletter.

Governor Mike Easley signed HB1340, the "Amateur Radio Antenna" bill into law. Highlights about the bill:

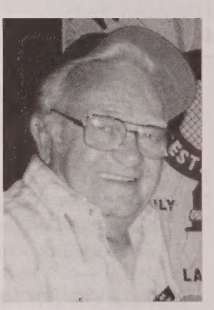
- Takes effect Oct. 1
- Does NOT overturn CC&Rs in neighborhoods with Covenants, Codes & Restrictions - Home Owner Association (HOA) antenna restrictions remain in effect
- Does permit antennas up to 90 feet in those areas regulated solely by municipal (County & City) zoning ordinances
- Applicants for antenna permits still need to adhere to aesthetic, health and safety requirements from governing municipalities, but those requirements can't be unreasonable
- Burden of proof shifts from the amateur radio operator justifying why he or she should be permitted to have an antenna, to municipal government specifying what can be done to make antenna installation work.

NC becomes the 25th state to enact a state antenna law based on the FCC's 1985 PRB-1 ruling. There is no federal antenna legislation that's been introduced in the current session of Congress.

Tim Slay, NC ARRL Section Manager, was scheduled to visit the following clubs on Field Day: Lumberton, Robeson County ARS; Elizabethtown - Bladen County ARS; Wilmington, Azalea Coast ARS; Jacksonville, Onslow ARC; Kinston, Kinston ARS; Greenville, Brightleaf ARC; Rocky Mount, Tar River ARC; Raleigh, Raleigh ARS; Durham, Durham FM Association; Greensboro, Greensboro ARC; Reidsville, Rockingham County ARS. The number of miles driven and the number of calories consumed is currently unknown.

Emergency preparedness has become a higher priority on US Congressman David Price's (D-NC) radar screen now that he has become the Chairman of the House Subcommittee on Homeland Security, so he spent an hour of his June 23rd Saturday afternoon observing how Amateur Radio operators in his district are preparing themselves for whatever communications emergencies might come their way. The "ham" operators, members of the

Ralph B. Atkinson WB4ZNB, Former Virginia SEC, (SK)
July 4, 1918 – March 18, 2007



Ralph believed that Amateur Radio was a privilege and that Amateurs had a responsibility to do something positive with that privilege. He dedicated his hobby to public service to a degree few can emulate. All who knew him refer to him as a gentleman.

Ralph's Amateur Radio awards include the Exemplary Lifetime Achievement award presented in November 2001 by Virginia RACES, and a Certificate of Merit for 17 years service to the Amateur Radio Emergency Service Program awarded in 1991. In his service to Amateur Radio emergency communications he held numerous appointments: Emergency Coordinator (EC); District Emergency Coordinator (DEC), and he was Section Emergency Coordinator (SEC) in 1977 and 1978. His station was, for many years, designated an Official Emergency Station (OES).

The National Traffic System (NTS) benefited from Ralph's commitment. His station earned Traffic Origination Certificates, was designated Official Traffic Station, Liaison Station, Official Relay Station and Net Control Station. Family members fondly relate stories of holiday dinners being delayed when the traffic net ran long with holiday greetings. Ralph, very reluctantly, had to give up his participation in traffic handling when his failing hearing made it hard to copy the messages.

For many years Ralph ran a phone patch from a missionary in the Caribbean to a family near his home. He told the story of how rewarding it was to finally meet the young man for whom he had provided this service, and only heard on the radio.

In the 1970's Ralph and two fellow Amateurs put up the Franklin, VA repeater (147.300). The repeater was moved several times over the years and was developed into a regional coverage repeater at its current location in Southampton County. He enjoyed using the repeater in support of Public Service events such as the Western Hampton Roads March of Dimes Walk, where he was usually the station at the turn-a-round location from his mobile rig.

Ralph was member #42 on the Virginia Fone Net (VFN). He made many friends on the VFN and his gentlemanly on-the-air conduct is frequently commented upon.

Public Service extended well beyond Amateur Radio for Ralph. He played a baritone ukulele in a group that entertained at various local nursing homes. He would say he was entertaining the 'old folks', many of whom were older than him.

Dedicated to lifelong learning, at age 83, Ralph completed a course in computer operation at the local Community College and began to use email with the screen name ralph1918.

Enlisting in the Navy in 1936 he served until his retirement with twenty years service. His WWII service included duty in both the Atlantic and Pacific theatres. In the Atlantic he was aboard the destroyer USS Sampson, which sank numerous U-boats while on convoy escort duty. Ralph served in the Pacific aboard the destroyer USS Fraser through the end of the war. The Fraser was involved in the naval action that supported the Battles of Guadalcanal and Iwo Jima. At his request, Ralph was buried in his Petty Officer's uniform.

As a tribute to his Life Membership in ARRL, friends of WB4ZNB will be placing a memorial brick on the Diamond Terrace at the entrance of ARRL Headquarters. Contributions to this memorial may be sent to:

Richard Harrell, C/O WTRA
PO Box 323
Smithfield, VA 23434

Write a personal check to Richard Harrell with "WB4ZNB Memorial" on the note line.

This announcement was inadvertently omitted from the May, 2001 issue. The SERA Repeater Journal regrets any inconvenience.

Orange County Radio Amateurs ("OCRA") and the Amateur Radio Emergency Service, were gathered at the Blackwood Farms county park property off NC Highway 86 between Hillsborough and Chapel Hill to take part in the annual North American-wide communications exercise they call "Field Day."

The ARRL approved the Pamlico Amateur Radio Society application for affiliation with the ARRL as a duly affiliated society with an affiliation date of June 14, 2007. Thomas Corwin, KI4NSP, of Arapahoe, is the trustee of the club.

The North Carolina Hurricane Expo took place Friday, May 4th, at the Elizabeth City Coast Guard Station. Area 1 DEC Champion Cox, K2IUN, and Area 2 DEC Bill Dawson, WA4SLC, spearheaded a display showing the EMCOMM capabilities of amateur radio. Also, in attendance was National Hurricane Center Director Bill Proenza, Meteorologist Jeff Orrock, KI4KKX, of the Raleigh NC NWS, and North Carolina Section Emergency Coordinator (SEC) Bernie Nobles, WA4MOK.

Grant Morine, W4GHM, received a phone call from Amateur Radio Newsline to inform him, he is the 2007 winner of the Young Ham of The Year Award. As part of the award package, he will receive a rig from Yaesu plus a week at Space Camp in Huntsville, AL. Yaesu will also pay for his travel expenses to the Huntsville hamfest August 11-12 to receive the award. According to the judges, Grant won largely based on his Eagle Scout project of designing and building thirty 220 MHz J-Pole emergency back-up antennas for the hospitals and Red Cross chapters in CARES, Carolinas Amateur Radio Emergency Services. Our thanks to Paul Magnabosco, AD4HZ, for being Grant's project adviser, and to Michael Smith, KI4UFM, and Larry Matheny, KI4WLJ, of Coastal Carolinas Health Alliance (CCHA) for sponsoring Grant's project.

The BARC newsletter noted that the Greenville Mayor Robert D. Parrott proclaimed June 17-24 as "Amateur Radio Recognition and Appreciation Week".

Frank Lynch, W4FAL, the North Carolina Repeater Coordinator, has been busy this past quarter. The following repeaters are coordinated or changed:

New coordination's for this quarter include:

K4ITL 442.200 Raleigh
N1RIK 442.250 Carthage
KB4HG 442.550 Chapel Hill
N4DBM 146.985 Elizabethtown
KD4ADL 444.925 Pineville
KD4ADL 443.825 Mooresville

The following existing repeaters were re-coordinated due to either ownership changes, location changes, and/or other technical changes outlined in SERA's Coordination Policies and Guidelines (CP&G).

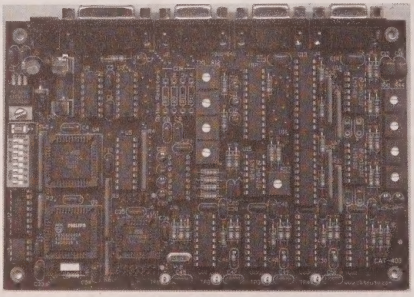
K4KSS 444.375 Franklin (ownership change)
KI4GMA 146.805 Canton (ownership and location change)
N4LEX 145.31 Thomasville (location change)
KD4ADL hub repeater Charlotte (location change)
N4DTR 147.390 Waynesville (location change)

I would to acknowledge the emails, the newsletters and updated websites that I use to obtain news for this column. Without each club's editor, this column and job would be tougher. As long as the editor has the space, we can keep printing the news. Send news, updates and event notifications to WA4KE@SERA.ORG, and remember – Emergency communications are only as good as the equipment and operators, keep supporting your local radio club and SERA.

(Please see pictures next page)

CAT-400 Repeater Controller

This controller combines the features of the popular CAT-250 controller and the RLS-1000 Remote Link Switch into a four- port controller ideally suited for sophisticated linking systems.



Features Include:

- Voice Synthesizer ID
- (20) Voice Messages
- (1) Repeater Port
- (3) Remote Base Ports
- (4) DTMF Decoders
- CW Identifier
- DTMF Audio Muting
- DTMF Pad Test
- (40) User Macros
- (50) Event Macros
- (64) Control Functions
- (4) Logic Inputs
- (4) Output Switches
- Internet Firmware Upgrades
- Optional Windows® Editor

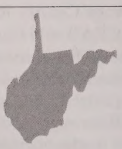
West Virginia



Richard Clemens, KB8AOB

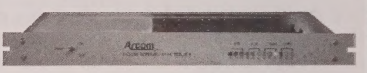
Greetings from West Virginia

I often talk about resistance to change that most individuals exhibit when confronted with the rapidly shifting world of technology. In my course on the management of information systems, I try to make it clear that it is imperative to realize this resistance exists and to prepare for any problems that result. My lectures really strike home when I realize that I too have been a casualty.

In my early teens (a very long-time ago) I became interested in the observation of local weather and recording various parameters such as barometric pressure, dew point, temperature, sky condition, and rainfall. I built my own crude weather station, got permission from my mother to put it outside (and out of sight) in the back yard, and started a log of information. I would

COMMERCIAL REPEATERS FOR AMATEUR USE !

Trade in your old repeater on a new 2 meter, 220 or 440 factory fresh commercial repeater.



With wattages available of 5, 25, 40, 50, 100, 180, or 400 watts of output. Complete packages available that include repeater, full featured computer controller, amplifier, preamplifiers, power supply, circulators, duplexers, cabinets and even hard lines and commercial antennas.

typically have two readings a day. In addition, I would clip the weather map each evening from the local newspaper (AFTER my father was done with it as I soon learned) and kept everything neatly organized.

My memory is rather fuzzy, but at some point I learned of the Government Printing Office and all the wonderful (and inexpensive) publications you could have mailed to your home. I was really excited to learn of a number of pamphlets regarding the weather, including descriptions of different types of clouds, information on how to read the symbols used on weather maps and even the daily weather maps themselves. Well, I just had to have a subscription to those real 20 by 30 inch weather maps. The weather maps would be mailed to you each day (that meant I would receive them two or three days after they were printed) and folded as well, since that was much cheaper. I managed to convince myself they were really worth the investment even if the local weather patterns were already long gone and the next system had arrived.

I grew up in one of those homes where you always had food on the table, something clean to wear and a bedroom of your own. What I did not have was an allowance. I remember being in envy of neighbors Joey and Billy who got money each week for doing nothing – or so it seemed to me. In my family, if you wanted money for something like weather maps there were always some jobs to do so you could earn the money.

The 8th annual TEN-TEC Factory Hamfest

Fri. Sept. 28 and Sat. Sept. 29, 2007!

Welcome hams from around the country to the 8th annual Ten-Tec factory hamfest! Discount sale on Friday and Saturday on new and used Ten-Tec ham radio equipment! Door prizes! Consequently, it really was my investment and "hard" work that was required to subscribe to those weather maps. As I remember, it was a little over seven dollars for a three-month subscription, and that bumped-up every time the postage rates changed.

If you are still reading this column, I assume you are wondering just where this dribble is going – read on. I will fast forward to 1998, when I find myself still interested in monitoring the weather plus owning a mountain cabin near Harman. I invested in a Peet Brothers Ultimeter 2000 weather station, the link to tie it into my 2-meter amateur packet radio station and some software to drive the whole system. The system monitored all of the typical weather parameters and made the data available to my packet node that I could link to from my home in Buckhannon which is about 45 miles away.

This system was enhanced a few years later when I was able to tie into the Automatic Position Reporting System (APRS) with my packet station and automatically transmit the information via a number of nodes to a station that would dump the packets on the Internet (an I-gate). Once on the Internet, I could view the information from any web connection in the world, including a set of graphs and charts that would summarize the data received over several days rather than just the current readings as before. The only catch was my APRS link off the mountain required a good connection to a fellow ham in Virginia with a packet station that I used as a repeater to forward the information toward the I-gate.

Unfortunately, that link is no longer available. I do not have a wired telephone connection in the cabin (since cellular is available in Harman) and thus my "Micro-Local" weather data is not available to me or as part of a larger network. "Micro-Local weather stations are untended and remote" notes Brian Wruble, W3BW, in his June 2006 QST article, but for the last year or so the data from my micro-local weather station is missing. This information was available as part of the APRSWXNET/Citizen Weather Observer Program and to anyone that choose to visit the web pages displaying my information as well as that of hundreds of other observers both hams and non-hams.

My point – change has removed for me, and I judge, hundreds of others, the low cost ability to use and tie into larger networks with the demise of packet radio and APRS systems. This is perhaps more important for West Virginia than many other states of the SERA system, as we have many very remote locations that are difficult to connect to by radio. Deep valleys with potential for significant flooding, howling winds with snow measured in feet on the ridges and frequent and often extended power outages that leave many communication systems at a standstill. Let us bring back amateur radio based data networks to the mountain state!

Speaking of networking – I do hope to "See you at the Mill" (WVSARC ARRL WV STATE CONVENTION Saturday, August 25, 2007, 8:00 AM Jackson's Mill, Weston, WV I-79, Exit 99, follow signs to Jackson's Mill. Meetings: ARES, WV Nets, ARRL Technical Forum; WV Repeaters, MARS, QCWA, DX Forum, Auction and more!)

ARRL

HAMFEST/CONVENTION CALENDAR

We urge hamfest sponsors to send their correct dates to the *Hamfest Calendar* editor as soon as possible

(hamfest@sera.org).

We acknowledge and appreciate assistance in confirming dates from SERA & ARRL Directors, the ARRL, commercial dealers, and many clubs and individuals.

Deadline for the Nov. Issue is Oct. 1, 2007

August, 2007

4..... Roanoke Hamfest • Vinton, VA

5..... 57th Annual Berryville Hamfest
The Shenandoah Valley ARC
• Berryville, VA

11..... Ellijay ARS Hamfest • Ellijay, GA

11.....9th Annual CFARS Swapfest
Cape Fear ARS • Fayetteville, NC

11.....Tailgate Party, Trident ARC
• Moncks Corner, SC

11..... Tri-State ARS Hamfest
• Huntington, WV

11.....Summer Swap Meet
Carolinas Chapter
Antique Wireless Association
• Valdese, NC

12..... Central Kentucky ARRL Hamfest
Bluegrass Amateur Radio Society, Inc
• Lexington, KY

18 & 19..... ARRL National Convention
Huntsville ARC & Hamfest Assoc.
• Huntsville, AL

25 & 26..West Virginia State Convention
• Weston, WV

25.....Cedars of Lebanon
Short Mountain Hamfest
• Gladeville, TN

31..... **Shelby Hamfest** • Shelby, NC

September, 2007

1 & 2.....**Shelby Hamfest • Shelby, NC**

7 & 8..... ARRL Day in the Park
ARRL MS Section/MFJ Enterprises
• Starkville, MS

8 ..... Greater Louisville Hamfest
• Shepherdsville, KY

15..... Paulding ARC • Dallas, GA

15 & 16..... **Virginia Beach Hamfest**
Tidewater Radio Conventions, Inc.
• Virginia Beach, VA

22..... Hazard Swapfest • Hazard, KY

22..... Kentucky Mountains Hamfest
• Chavies, KY

28 & 29..... **8th Ann.Ten-Tec Hamfest**
• Sevierville, TN

October, 2007

6.....**Rock Hill Hamfest**
York County ARS
• Rock Hill, SC

13.....Oak RidgeARC Hamfest
• Oak Ridge, TN

13..... Amateur Radio Club of Augusta
• Evans, GA

14..... Maysville Hamfest
• Maysville, NC

20.....GrayHamFest • Gray, TN

20.....Clarksville Amateur
Transmitting Society
• Clarksville, TN

20.....Al Brock Memorial Hamfest
• Rome, GA

20..... **Pfafftown Swapfest**
Forsyth Amateur Radio Club
• Pfafftown, NC

October, 2007 (cont.)

20.....Fall Swap Meet
Carolinas Chapter
Antique Wireless Association
• Jamestown, NC

27. **Sumter Amateur Radio Assocation**
• Sumter, SC

27 & 28 ..... **Hamfest Chattanooga**
Chattanooga ARC, Inc. W4AM
• Chattanooga, TN

November, 2007

10..... Central KY Hamfest
• Richmond, KY

10.....Montgomery Hamfest
• Montgomery, AL

10.....BeachFest 2007
Grand Strand ARS
• Conway, SC

18..... **JARSfest**
• Benson, NC

December, 2007

1.....GAARC Swapfest
Gastonia Area Amateur Radio Club
• Gastonia, NC

January, 2008

12.....Winston-Salem FirstFest
• Winston-Salem, NC

12..... Greenwood Hamfest
• Greenwood, SC

*For hamfests in **bold:** please see ad in this issue.*

THE SERA OFFICIAL REPEATER INDEX

REPEATER LISTINGS FOR: GEORGIA ■ KENTUCKY ■ MISSISSIPPI ■ NORTH CAROLINA ■ SOUTH CAROLINA ■ TENNESSEE ■ VIRGINIA ■ WEST VIRGINIA

IMPORTANT NOTICE: The SERA ***Repeater Journal*** is Copyright 2007 by the SouthEastern Repeater Association, Inc., the officially recognized Amateur Radio Repeater Coordinating organization for Kentucky, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia.

The SERA ***Repeater Index*** may NOT be published or reproduced, in any form, by any individual, publication, electronic source, or any other means, for distribution without the expressed written consent of the SERA, Inc. All other rights reserved.

SERA will not be responsible for incorrect or omitted listings. The responsibility of correct listings is that of the actual repeater owner or sponsor. SERA makes every effort to keep the index as accurate as possible with information provided. The SERA ***Repeater Journal*** repeater lists contain certain repeaters which are NOT or have not been coordinated by SERA, or are not operating according to recognized frequency utilization plans. SERA does not necessarily condone or recognize such repeaters as being legal or illegal. They are listed in our indexes primarily to keep our readers informed of all repeaters known in the areas served by The SERA.

Some repeater owners or sponsors allow voice as well as other functions on their machine. Operators should check with owners for additional information about what is allowed, and what features are available. Digital Repeaters with normal input/output (pairs) are listed in the regular FM repeater index. Digital systems operating simplex are not coordinated by SERA and are not on our repeater lists. The *codes* column contains the tone or access code for those repeaters which the owner or trustee has given us written permission and asked that we publish them . Access tones are listed for the reader's convenience both in the By-State, and the By-Frequency listings.

Entries with "#" in front of city indicates repeaters added to this index that have not been coordinated through the local SERA state coordinator. Owners may work with their coordinator to get this indicator removed. Repeaters that have been coordinated but may not yet be on the air yet are listed with "PROP" in the codes column. Owners should notify SERA when on the air.

Repeater owners are reminded to contact their local Frequency Coordinator for assistance in coordination, changes in their listings, or any other requirements. All SERA services are FREE. It is very important that the annual SERA repeater datasheet, sent to all known repeater operators, be accurately updated each year and returned to SERA.

SERA RECOMMENDED FM VOICE SIMPLEX

10 Meters:	29.600#						
6 Meters:	52.490	52.525#

PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

Did you know that SERA assistance in coordination, technical help, or interference information is FREE. We do not charge for any of our services. Our operating expenses are derived solely from voluntary membership of Repeater Owners and users.

In 2008, SERA enters it's 37th year of successful operation and service in the SouthEastern 8-states.

Our volunteers are here for you. If you have any questions about SERA, don't hesitate to call or ask. It's that SIMPLE

PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

Six Meter DX--Then and Now

My first experience with 6 meter DX occurred almost 50 years ago, but it is still vivid in my mind and seems like only yesterday. I was a teenager, on a budget, and just getting on 6 meters. I didn't own a ham receiver, but I did have a Bendix broadcast AM receiver. After some prudent trading with a friend, I was now the owner of a "slightly" used International Crystal FCV-1 six meter converter. The converter's IF output was in the broadcast band (it had a 49 mc crystal). So, with the Bendix receiver and converter I had a low cost, although somewhat crude, receiving capability for six meters. The antenna came next and consisted of a homemade ground plane just outside my second floor bedroom window. I constructed my first six meter transmitter from junk parts, traded items, and a few store-bought components. The 2E26 final ran about 14 watts input (back then, transmitters were usually not rated by their output power). The Colpitts oscillator, and doubler, used a 12AT7. The modulator was a homemade audio amplifier I got in a trade, outfitted with a Triad modulation transformer. The modulator used a 6V6, along with a 12AX7 speech amplifier, and provided the needed audio power for the transmitter. The power supply, also external, was homebrew. And I owned two crystals, so I was not very frequency agile. But now back to my experience with DX. One spring morning in 1958, I was tuning the band and heard a station with the call LU3EX---I quickly did a little research and found he was in Argentina. I made several frantic calls to him but, alas, my efforts were futile. This was, as I later found out, F2 skip and the cycle was slowly diminishing with fewer sunspots to excite the ionosphere with solar radiation. My first DX contact, sporadic-E, was with a station in Texas, followed by several in Florida. And so I started my odyssey to work more DX, all wetted by the memory of this failed attempt to contact that station in Argentina.

Getting Serious About 6 Meter DX

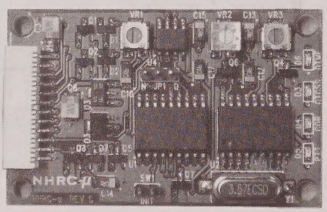
My quest for a better six meter DX station resulted in the construction of my second six meter transmitter with more power and a better modulation system. This time, I selected a 6146 final (about 40 watts input) along with

NHRC

REPEATER CONTROLLERS

NHRC-μ (Micro)

Ultra-Compact
Repeater Controller/IDer



(actual size 1.25" x 2.00")

NHRC-μ Features

- Repeater Controller, IDer, or Beacon modes
- High and low-going COR and CTCSS inputs
- Extremely compact
- "Intelligent" ID algorithm
- Programmable CW ID speed and pitch
- 21 Control operator settings
- 4 User commands
- 5 Saved setups
- Touch-Tone remote control and programming
- Windows™ based, serial port programming
- Hang timer, ID timer, Timeout timer, and CW messages stored in non-volatile memory
- Jumper-selectable receiver deemphasis
- LED CAS, CTCSS, PTT, and DTMF indicators
- Extremely low power consumption

The NHRC-μ ("Micro") is a compact repeater controller/IDer designed for easy installation in close quarters. The NHRC-μ can function as a conventional repeater controller, as an IDer for repeaters, or as a beacon controller. It can be easily mounted with double-sided foam adhesive tape, and connected to the equipment with flying leads, allowing for easy installation in almost any equipment.

The NHRC-μ is programmable by sending DTMF sequences over the air, or by computer with a serial port connection and the free NHRC-μ programming software. The CW ID, hang time, ID timer, timeout timer and courtesy tone beeps can all be programmed by the user. All programming is stored in non-volatile EEPROM memory.

The NHRC-μ (Micro) (Assembled and Tested): $119

plus shipping and handling

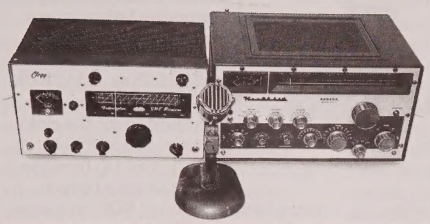
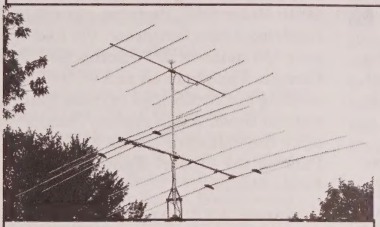
Visit our web site for our latest Catalog



A serious 6 meter DX station from the early 1960's era. A Clegg Interceptor receiver is on the left and a Heath Seneca transmitter on the right. With these items, both 6 and 2 meters could be covered. My original high impedance crystal microphone is in the middle.



Antenna system at K4PZT. A 5 element 6 meter Yagi is at the top. An HF beam is below.

a Hartley oscillator using a 6U8, the second section being used as a doubler. The twenty watt modulator used a 12AX7 speech amplifier, with the second section serving as a phase inverter coupled to a pair of 5881s (high quality 6L6s) running class AB1. I added a WW-II Command transmitter, modified, to serve as a VFO so now I was frequency agile. My receiver was a Hallicrafters SX-25 and was configured with another Internal Crystal FCV-2 converter (with an IF output in the 7 mc range). I also upgraded, again through a trade, for a six element wide spaced Yagi. So my quest really was off to a good start and, in the ensuing years of high school and college, I was able to work a fair amount of DX with this station and confirm QSOs with all states in the continental United States except one east of the Mississippi and just a few remaining states in the 7 call area.

Getting Serious *Again* About 6 Meter DX

Although I continued to be active in the years that followed, a career in broadcasting and engineering took most of my available time. I mostly operated mobile while traveling to work, and later became serious about chasing DX on the upper HF bands (mostly 15m and 20m) with a Kenwood TS-520. After retiring, I decided I'd have more time for amateur radio so I started to acquire equipment and get more involved in the hobby. I decided on a Japan Radio Company JST-245 transceiver for several reasons, including its capability to cover six meters. Since I wanted to work DX on both HF and 6 meters, I acquired a tower complete with Hazer to make antenna installation easier. I settled on a 5 element Yagi for 6 meters with an HF antenna below for 20,17,15,12 and 10 meters because of space limitations. Since I wanted to work some 2 meter sideband, I also installed a side-mounted horizontal loop for this band. A TEN-TEC model 526 transceiver is primarily used for 2 meters, but is also used with a 6 meter horizontal loop for monitoring. Having primarily chased HF DX for the past few years, I decided to get serious again about 6 meter DX and I've been "rediscovering" the excitement from my youth pursuing the "Magic Band," as it's now called. This spring and summer has been particularly exciting and fruitful. Propagation has been great with many nice openings, including a number of double-hop E Skip paths to new locations. The last week of June, 2007 was really good to those chasing DX on 6: it was open to Europe, the Caribbean, South America, Canada, Mexico and other places. In the short period of a few days I'd worked 10 countries on 6, and got the remainder of the states in the 7 call area I needed. I still need that one "elusive" state east of the Missis-

Six Meter DX QSL cards---then and now. Early 1960's era cards are on the left and 2007 DX QSL cards are on the right.

sippi, plus Alaska and Hawaii, for 6 meter WAS.

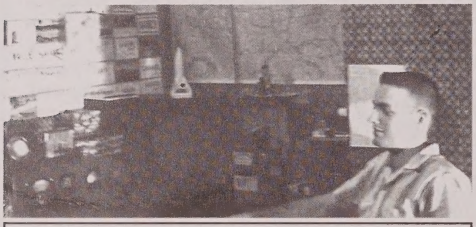
The pictures with this article cover some sample six meter DX QSL cards from contacts made almost half a century ago along with some worked recently, an example of a serious 6 meter station used eons ago, my third (and final) homebrew 6 meter transmitter from the early 1960s, and my present antenna system in 2007. I hope you enjoy the "memories" about 6 meters and I encourage you to try out the "Magic Band." I think you'll find it both exciting and illusive, with the many modes of propagation available.

Georgia

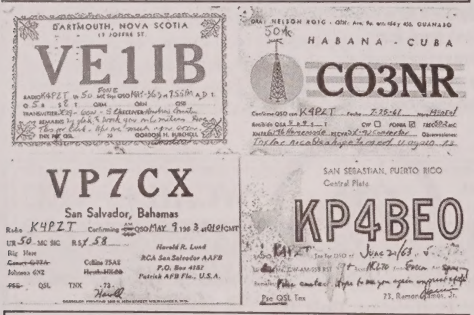
John Talipsky, N3ACK

Hello Georgia!

The Alford Memorial Radio Club was pleased to announce Lee Flack, KD4HPD, was awarded the President's Volunteer Service Award in an Awards Ceremony in the Georgia-Pacific Auditorium. Lee was presented with a Gold Award Pin and commemorative documents from President Bush, and the President's Council on Service and Civic Participation. The Gold Award was for Volunteer Work performed during 2006. Lee was not expecting this award and was very proud to accept this for his Amateur Radio volunteer work in front of his non-Amateur coworkers and peers. We do not know of any other Radio Amateur that has received this award in Georgia, so Lee wished to share it with everyone, because so many of you deserve this award also. The documents can be viewed at http://www.totr-radio.org/lvflack-award.html.



K4PZT in 1960. The 6 meter transmitter, homebrew, ran 40W AM. Receiver was Hallicrafters SX-25, with FCV-2 converter for 6.



1960's era 6 meter DX QSL cards (outside the USA)

The Atlanta Radio Club reported another successful hamfest. A large crowd came out the first Saturday in June, trolling the huge boneyard and indoor space at Jim Miller Park looking for that hidden gem. Many vendors were on hand inside selling new equipment. The Forum topics included D-Star presented by Greg Sarrat, W4OZK, and The Shape of Amateur Radio by Dan Henderson, N1ND. The Atlanta Hamfest would like to thank all of those who attended.

The Oconee County ARS was recently recognized for more than a decade of service to the City of Watkinsville and the citizens of Oconee County Georgia. Mayor Jim Luken issued a proclamation, which declared the week of June 18-24, 2007 as AMATEUR RADIO WEEK. This was a great lead-in for the club's participation in Field Day, operating as 1F, from the Oconee County Government Annex Building/ EOC club member Bill Ronay, KM4LS, reported.

The Silver Comet ARS held a Special Events Station at Picketts Mill Battlefield, Dallas, Georgia, operating 20/40 Meter SSB. Participants will be receiving a nice certificate. We had over 135 contacts in 27 States and Canada. Thanks to all and we will be sending out certificates to those that request them. And a special Thanks to all the Folks at Picketts Mill State Park for the support of this Special Event Station.

Gwinnett ARES Appointments

Scott Hartlage, KF4PWI, has been appointed to serve as AEC - Response Teams. Scott has been the EOC Response Team Leader, the AEC - Paging and a very active member of Gwinnett ARES for many years. He assumes the position previously held by Jerry Pereira, K4KBL, who is stepping down to spend part-time at their new property in North Carolina. David Adcock, KA4KKF, will assume the position as EOC Response Team Leader after the promotion of Scott, KF4PWI, to AEC - Response Teams. David has been a valuable member of the EOC Team and brings many years of Amateur Radio experience and leadership to the Team. He is a past President of GARS and remains active as Newsletter Editor and on the Repeater Committee. Buford Digipeater In Service - The third digipeater in the Gwinnett ARES 145.03 MHz digital network is now in service with the addition of the Buford site. The call sign of the station is WX4NET-6 with the alias of BUF. For those connecting as a node, the node ID is BUFGA (keep in mind that the ARES Packet Client does not support connecting as a node at the present time). The Gwinnett ARES digipeaters have changed their aliases. The call signs, aliases and node IDs are as follows: Buford WX4NET-6 BUF BUFGA; Lawrenceville WX4NET-7 LAW LAWGA; Snellville WX4NET-8 SNL SNLGA

Georgia Young Hams in the News

Seventeen-year-old Andrea Hartlage, KG4IUM, of Grayson, Georgia, was recently announced as the winner of the prestigious William R. Goldfarb Memorial Scholarship for 2007. The ARRL Foundation Board voted unanimously to name Andrea, who graduated from Grayson High School (Grayson, GA) in May with a 96.05 grade point average. Awarded to one high school senior each year, the Goldfarb Scholarship enables the recipient to receive a four-year undergraduate degree in engineering or science or in the medical or business-related fields. Licensed since 2000 and an Amateur Extra class licensee since 2003, Andrea is the daughter of Scott, KF-4PWI, and Lisa Hartlage. She plans to attend Georgia Institute of Technology this fall to pursue an undergraduate degree in aerospace engineering. In 2003, the ARRL Board of Directors honored Andrea by naming her to receive the ARRL Hiram Percy Maxim Memorial Award; the following year, she was Amateur Radio Newsline Young Ham of the Year (YHOTY). Andrea coordinated youth activities and the Youth Lounge for ARRL EXPO at Dayton Hamvention in 2005 and 2006, and also was a forum presenter and participant. Andrea has continuously worked hard to introduce youngsters to amateur radio during the November hamfest hosted by The Alford Memorial Radio Club in Lawrenceville. Congratulations Andrea!

Here's a terrific site for young people who are interested in getting a ham radio license, as well as for those who've already earned that ticket: http://www.youthtech.com/hamradio

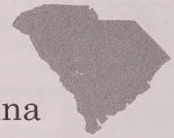
South Carolina



Roger Gregory, W4RWG

Hello South Carolina,

The South Carolina News is short this issue. A lot of folks must be on vacation because I have not received many newsletters. I encourage you to send me those newsletters. I will be happy to accept them via US Mail, but I prefer email.

I visited the hospital for the first time ever the week of June 18th with kidney problems. I am much better now and back to normal, or as normal as I can be. I appreciate the cards and calls and prayers I received while I was in the hospital. It is a nice place to visit, but I wouldn't want to live there.

Kentucky

Pat Spencer, KD4PWL

Being a twelve inches under normal rainfall, Kentucky is facing a drought this summer. Like rainfall, Kentucky amateur radio news is also scarce. Hopefully the rains will come soon, and I encourage you to contact me with amateur radio and repeater news in your area so we can cover it in the next issue.

Hamfest Calendar

Before our next issue, there are three hamfests in Kentucky.

August 12 – Central Kentucky ARRL Hamfest, Lawrenceburg, KY Contact Jeanie Dalton-Pugh KB8QLC, 859-619-8164.

September 8 – Greater Louisville Hamfest, Shepherdsville, KY. Contact Bob Myers K4RVM, 502-935-6710.

September 22 – Kentucky Mountains ARC Hamfest. Chavies KY. Contact John Farler K4AVX, 606-436-5354.

Meet Kentucky's new Section Emergency Coordinator:

For the first time in eight years, Kentucky has a new ARRL Section Emergency Coordinator (SEC). Jim McDonnell, W2LTB assumed the post April 1, 2007. An amateur radio operator since 1994, McDonnell was drawn to enter the hobby due to his interest in emergency service.

McDonnell's first taste of amateur radio came from his uncle Patrick McDonnell, W2LTB. He would, "sit and watch for hours while he was on the radio making worldwide contacts." When he joined a search and rescue group he decided to take the exams and received the call KE4QCJ. When his uncle became a silent key, McDonnell wanted to honor his legacy. He upgraded and applied for his callsign.

Naturally, McDonnell sees the core mission of ARES as "Emergency Communications." In an era of overloaded and budget-strapped agencies, he sees ARES as an important community resource as a "cost free interoperable emergency communications service." It also provides valuable assistance to non-profit public events allowing more of the proceeds to be devoted to the charities they raise money for. ARES also provides elmering to new hams in community service that extends volunteerism to organizations outside of amateur radio.

He feels that "ARES is a great organization with many wonderful people. Those active members are greatly appreciated and make KY ARES what it is. We all need to work together to help the areas with little or no coverage to get them active and involved."

Like his predecessor, McDonnell has a keen interest in and emphasizes training. In the post 9/11 world, new methods and standards under the National Incident Management System (NIMS) has raised the bar for those serving the public. These standards apply to amateur radio operators serving with emergency management agencies, hospitals, and the like. McDonnell comments that "With Federal mandates in place, becoming compliant is the most important thing," amateurs can do.

To grow on past accomplishments, McDonnell advocates that ARES members take a more involved role in disaster response. "I'd like to see amateurs branch away from the thought that we are 'Only radio operators'. In truth we are a public service. Cross-training is a must in today's society. Amateur radio operators are needed in many areas and still perform EMCOMM duties." He continued, "CERT training is another good avenue for operators. They will teach you the basics of working in a disaster, basic fire suppression etc. All important things to know."

Training is only half of the equation, according to McDonnell. "Training and practice are key to any situation. You may have the training but if not practiced through application you may not be able to perform optimally when it's really needed." To gain experience in community emergency communication service, he encourages all amateurs to participate in "Drills, exercises, Field Day, public service events, etc." "Practice your ICS. Practice good radio procedure. Remember your ABCs of emergency communication," he concluded.

His dedication to training does not mean that McDonnell doesn't understand the challenges he and other ARES coordinators face. "The largest problems I can see are training and drive. Operators do not want to be compliant with regulations and quite a few need a fire lit under them. That's not to say that we do not have a great group of people that are trained and highly motivated. Those in Kentucky that are driven have a very impressive record. ARES would not be what it is today without them."

"Local ECs and DECs need to assure that their people are trained. 95% of the training is free and online. Not a lot of personal time is used. The courses are pretty straight-forward. The remainder of additional training can usually be obtained through a working relationship with your local emergency management agency. For a list of training sites online visit, http://

kyares13.kyham.net/training.html," he added.

Inactivity, or no information from coordinators is another challenge McDonnell faces. His goal is to light a fire under those who exist off the radar. "The ARRL does mandate that monthly reports be submitted so we can monitor activities. Monthly reporting is simple, online and only takes a few minutes. It's not difficult to keep track of callouts, activations, events or even meetings. Monthly reports need to be submitted by every League Appointed ARES position from Official Emergency Station all the way up to Section Emergency Coordinators," he relates

To the influx of new hams who have recently received their tickets, McDonnell shared, "Welcome to Amateur Radio! Give back to the public. Join ARES and enjoy the public service side of amateur radio. Radio is a fun and great hobby. I'd ask that all remember what our primary purpose is."

SERA TECHNICAL ARCS & SPARKS

By Don Edwards, WS4NC

Crystal FM receivers?

...and what is the resonate frequency of a paint can?

First, thank you to all those who emailed about the first installment of Arc & Sparks and especially those who ordered the LM386's. There's more about the LM-386 and also a new TDA-2003 10-Watt audio amp board at the end of this article.

FM and Crystal Radios.

Last quarter I did a little LM-386 amplifier and mentioned how great it works connected to a crystal receiver with about 40-feet of antenna and tuned to the SW bands at night. Kind-of brings me back to when I was a kid listening to old SW radios. Of course, that's HF stuff and SERA is more VHF orientated. So how about a crystal FM receiver?

First, someone is going to tell me that you can't receive FM on a crystal receiver. Well, yes you can. Back when all we had were wood-burning two-meter radios (that means AM, Gonsets and the like) we could listen to FM by tuning slightly off frequency. By tuning slightly off frequency the FM signal would be at the edge of the pass band of the receiver's IF. The IF pass band attenuates off-frequency signals, but not quite like a brick wall. Compared to today's radios the pass band of a Gonset was wide as a 1957 Buick, and the radios were not much lighter. Anyway, as the signal moved closer toward the frequency the receiver was tuned to - the IF signal would get stronger and as it moved away it would get weaker because of the attenuation of the pass band. The technique was called slope tuning. Because the FM signal was moving up-and-down the slope of the receiver's pass band the FM of the signal was converted to a varying amplitude, just like AM. It worked, but it wasn't exactly a Lamborghini... more like a Nash Metropolitan.

How can you slope-detect FM with a CRYSTAL receiver? At VHF frequencies it is easy; all you need is a very-very sharply tuned circuit (high Q). Mathematically understanding Q can get a little messy but the concept is everyday experience. A mechanical object with a high Q would be something like a bell, or a crystal wine goblet. Both of them not only ring when struck, the higher the Q the longer the ring continues. A mechanical object with a low Q would be, let's say a brick. Just because you didn't hear the brick ring when you kicked it does not mean you didn't scream. But the brick did vibrate, just not much. That means a low Q. And in case you kicked the brick, a low (I)Q for you. Electrical Q is the same as ringing, just at RF frequencies.

While at broadcast AM and HF frequencies high Q may be hard to obtain, it is very easy at VHF frequencies. An enclosed metal space (cavity) can be tuned to a very high Q, but space may be a problem. A metal garbage can (remember those?) can be tuned to the 10 or 6 meter band. It's been done, check old ham magazines. But as we get to two-meters, tuned cavities get to more reasonable sizes. All we need is an antenna, a pass cavity, a detector, and an amplifier to listen to the detected audio. I guess you have an antenna. For a pass cavity, read on. For the detector,a 1N34 diode in series with a 50-pf ceramic cap will work, or check the ARRL handbook for an RF detector (it's basically a crystal radio). The amplifier? How about an LM-386 board?

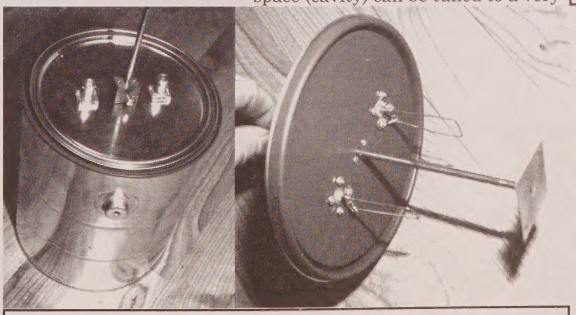

Figure 1. How to tune a paint can.

Let's build one!

On the way to doing this project I wanted to build a cavity. The first thing I needed was a metal container. A number 10 food service can is about right, but I never found one. One day while wondering around Lowes I discovered I can buy empty paint cans. The thought had never occurred to me before. I'm not sure why a normal person would want to buy an empty paint can, but then I'm not normal. They cost $5 each, which seems a little bit high (without any paint)--- but what importance is there in money when science is involved? I didn't bother with design details, I just whipped something up with what parts I had on hand for my new (empty) paint can. I had the brass rod and BNC connectors. The mounting block for the rod was an almost perfect item found in my brass scrap, as well as a small piece of brass to add to inside-end of the brass rod. Yes, I'm a pack rat. It's required to be a ham. Read the by-laws. Anyway, one paint-can cavity. Cool: it tunes from about 100 to 300 MHz. Above 350 MHz other resonate modes take off. Below 100 MHz everything rolls off quickly. Mechanically, the top is not strong enough to hold the brass rod well, but that does add a fine tuning touch. Artistic this is not; just a proof-of-concept. A sweep on a network analyzer is in Figure 2. There is a lot that can be done to make this a better cavity

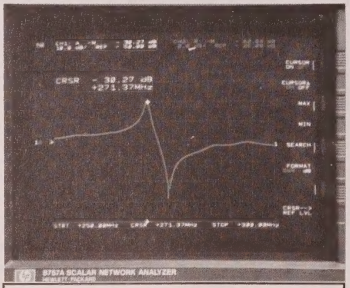

Figure 2. Photo of a network analyzer sweep of the paint-can cavity from 250 to 300 MHz.

and to improve it's function in many ways, but the cavity isn't the main purpose of this project. The crystal FM receiver is.

How well does it work?

The crystal FM receiver: it works. Yeah, but how well? OK, not very well. As far as my paint-can cavity goes, it tunes too crudely to get it on any particular frequency easily, even wide stuff like the upper FM broadcast band. If you have a good outdoor antenna you can hear stuff, but it's deaf as a door. Putting a 40-dB wide-band lab amp between the antenna and the cavity does make a big difference, but that seems like

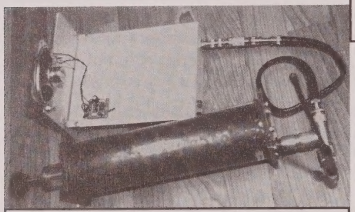

Figure 3. A commercial cavity with a whip antenna and my test rig. The aluminum chassis has a LM386 board on it. Headphones were preferable to a speaker.

a lot of effort for such a project. My cavity does have more attenuation than I think it should, but it was a rush job and I took no effort to optimize it. Just to make sure it wasn't my paint-can "magnum-opus" I tried a commercial cavity. It's better, but not that much. Sensitivity is relative, but on a calibrated signal generator anything below -20 dBm was too hard to hear without turning off the air conditioning, even with pushing the generator up to 50 kHz deviation and using headphones with the LM-386 volume running "full-tilt boogie". I also tried a commercial RF detector as well as a 1N34 detector. The 1N34 was better. Lower loss cavities would help but I'm not sure it's worth the effort.

I had heard rumors of this idea, the crystal FM receiver, decades ago. I also heard rumors that some of these were built to (illegally) listen to the cellular bands. Maybe with some RF amplification, but why? And just in case you are thinking about (illegally) using this to listen to call phones, don't bother. There is very little analog cell traffic any more; most everything is digital. And remember, this idea doesn't include a squelch: listen to unsquelched noise for long and you'll be day dreaming about waterfalls. Also, there's that pesky issue with the FCC.

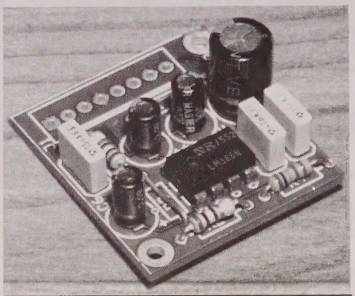

Figure 4. The final LM386 circuit board, with parts, from last quarter's Arc & Sparks.

Now I know why I never really saw one or knew anyone who built one of these. I don't think it's worth the effort if the result desired is a usable receiver. If the desired result is fun and some knowledge, then blast away! In the end the paint-can cavity turned out to be the most interesting idea, if also not entirely the most practical. Hey, I never promised practical! If anyone tries this I'd like to know about it. I'm sure it can be optimized and I may play with it again in the future, but there are too many other projects on my list. I've been excited about trying this since it first occurred to me a couple of years ago. Now I think this idea is the Yugo of the ham radio world. Your mileage may vary.

LM-386 Amplifier kits

The LM-386 amplifier boards and kits are done and available (and

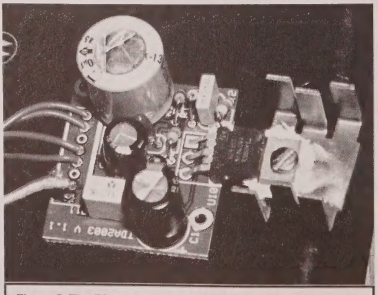

Figure 5. The TDA-2003 amplifier.

a number of you have them). The circuit boards have been made, and now a low-power audio amp is a quickly done item. A picture of the assembled board is in Figure 4. After getting several responses on the first few kits, the kit parts have been refined down to what would be the minimum parts in common in almost any project. No potentiometer is included because the consensus was that is almost always going to be a front panel item and there were different ideas about what form it should take. The board expects the audio from the wiper-arm of the pot. Likewise, there is no speaker or headphones because each project is different. Generally the 386 is best driving headphones, although a big speaker will give a nice sound.

Also, thanks to my victims (aka beta-testers) there is a BEASTLY audio amplifier board. The TDA-2003 audio output chip is used in a lot of ham rigs. Depending on the IC manufacturer and the load impedance the maximum output audio is as much as 12-watts, but 6 watts is a more realistic number. I have a pcb board done. With an old mic and one of those really great Motorola sur-

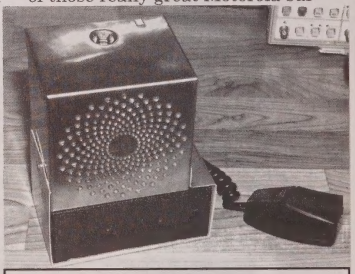

Figure 6. N0KTY's version of the TDA-2003 audio amp. The bottom is a 12-volt alarm battery.

plus two-way radio speakers it is as LOUD as a trumpet in a barrel. (No I didn't put in a volume control, why do you ask?) It has enough audio to make a decent small PA. N0KTY built one of these into a metal speaker case with a 12-volt alarm battery mounted to the bottom; his wife uses it to talk to her students riding around a horse-training arena.

In order to get the prices on the circuit boards down I had to have lifetime supply made, so I'm not likely to run out anytime soon. The final kits are $10 for one board (LM-386) with parts, or three boards for $10 if you have your own parts. I don't have the exact parts down for the TDA-2003 so I don't have kits as I write this, but I do have the boards. The TDA2003 kits will likely

Web Creations & Graphics, LLC, (WCGNET.net) of Beckley, West Virginia, is your one stop Internet shop for website design, website hosting, dial-up internet access to the entire state of West Virginia, and much more. Call us at 888-757-6670.

be a little more, but three boards without parts are still just $10. Just so you know, this is a service and a convenience, not a business. It isn't that hard to build these circuits "dead-bug" style. The assembly instructions and parts with Digikey or Mouser numbers can be downloaded free from my web site: www.dwepe.com/kits As time allows I will be adding other circuits. My main goal is get people to build stuff. Please feel free to email me with any ideas or suggestions. I have very aggressive Spam filters on my email, so please include "arcs and sparks" in the subject line. If you don't get a response in a few days send another email. My mailbox overfloweth will offers of male-interest pharmaceuticals, low-interest refinancing, bequests of millions from unknown relatives and other great opportunities. Usually about 200 a day. Spam will be the downfall of human civilization. See you next quarter!

ALINCO makes a SPLASH

with great audio and high grade waterproof design!

- **DJ-V17T** 144 MHz HT
- **DJ-V27T** 222 MHz HT
- **DJ-V47T** 440 MHz HT

These powerful HTs make perfect companions for outdoor activities like fishing, camping or snow-sports.

The rugged polycarbonate materials are compatible to IPX7 so these HTs are submersible 1m/3ft. for 30 minutes! And unlike water-resistant radios you may have looked at before, the DJ-V17, DJ-V27 and DJ-V47 all have a large 40mm internal speaker so the audio is clean and crisp, not muffled. You can enjoy 500mW max audio-output, new two-touch repeater access, and over 200 memories. A special battery-drain function helps avoid battery memory-effect. Other features include an ergonomic design, ultra-flexible antenna with SMA connector, 39 CTCSS settings, split function, two-level attenuator and more. Whatever your idea of outdoor fun, Alinco's DJ-V17, DJ-V27 and DJ-V47 are ready to take on the challenges of rain, dirt and dust and come back for more.

Actual Size

- New, two-touch repeater access
- High grade waterproof materials compatible to IPX7 (submersible 1m/3ft. for 30 min.)
- Rugged polycarbonate body resists dirt, dust and moisture
- Large 40mm internal speaker for great audio!
- Highly visible backlit alphanumeric display
- Direct frequency input through illuminated keypad
- 200 Memories, plus one call channel and one repeater access parameter memory
- VFO, Memory and Scan modes
- Ultra-flexible antenna with SMA connector avoids breakage
- 39 CTCSS tone squelch (encode+decode) settings
- Tone burst function (1,000, 1450, 1750 and 2100Hz)
- Battery-drain function avoids memory-effect
- Cloning feature
- Ni-MH standard also uses optional Lithium-ion and NiMH battery packs or AA dry cell case
- SMA antenna port
- 2-level attenuator
- Waterproof single mic/speaker jack

(Actual Size)

ANALOG & DIGITAL.

It's not just digital. Analog is there, too. Both capabilities in one radio. And what a new radio it is! With infrastructure and a family of D-STAR compatable radios, you're not buying an experiment. That said, digital is the future of amateur radio. And experimentation is a foundation of ham radio. So now you have to ask yourself, "do I pick up the analog only '91A version, which is optionally upgradeable to digital? Or do I take the '91AD, which offers digital right out of the box?" It's your choice. Commitment can be a wonderful thing.

Coming soon to your authorized Icom dealer!
